

Multi-Factor Authentication

Reduce the risk for fraudulent activity. Build trust. Ensure your rewards are in the right hands.

5 Things You Should Know

Add an extra layer of security. Insert challenge questions into the reward redemption process.

Trust that your rewards are in the right hands by verifying your recipient's identity, without the need for PII.

Improve research data validity by confirming your participants' information.

Prioritize users' security concerns with fully-encrypted data.

Track the outcomes. Receive reporting on recipients who fail the authentication process.

“

The VI Platform is the tool we are using for managing our incentive rewards and we find it to be very user-friendly and fully secure”
