

Vi's Reward Platform Fraud Prevention

Detect. Prevent. Manage Redemption.

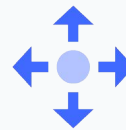

5 Things You Should Know

Block email addresses and values you send in user defined fields by timeframes and reward count.

Set parameters on a client level or program level.

Ensure rewards are delivered to the right recipient.

Add multi-factor authentication to your program for a deeper level of security.

Realtime Reporting: Date and Timestamp of when a reward is blocked is available in Vi Now via Reward DNA and reporting.
